

NOTE 1: Current-limiting resistor for solenoid relay LED. Teensy 4.1 has max of 4 mA, instead of 10 mA for Teensy 3.6. For this particular relay: V_f=1.3 V, I_f=3 mA

NOTE 2: Current-limiting resistor for light relay LED. Teensy 4.1 has max of 4 mA, instead of 10 mA for Teensy 3.6. For this particular relay: V_f=1.32 V, I_f=3 mA

Note 3: Current-limiting resistor for trial switch LED. Teensy 4.1 has max of 4mA output. For this LED: V_f=3.2V and 0.5mA required.

Note 4: Current-limiting resisitor for response switch LED. Teensy 4.1 has max of 4mA output. For this LED: V_f=2.15V.

NOTE 5: Only if using two solenoids

NOTE 6: Only if using microphone through Teensy
